Subject: Re: Fw: Astronomical software articles within Data Science
Journal

Dear Professor Gray, thank you for your note. These abstracts describe research and work that are definitely in the scope of the CODATA Data Science Journal, and we would be pleased to publish the accompanying articles. The mix of scientific papers and reports also fits well with the kinds of articles we like to publish.

We will send the papers out for review, so if you, or the authors, could suggest reviewers for the submissions this will help the review process.

Please do let me know how we can help you distribute the results of your session and any subsequent discussions, or if you have any questions at all about the submission and publication process.

Best regards,

Bill Anderson
